

PRODUCT UPDATE – February 2010 (last update 06.11.2023)

Nozzles and spare parts for ELECTRONIC UNIT INJECTORS EUI and SMART INJECTORS Suitable for Delphi® systems

The **Electronic Unit Injector (EUI)** system was developed by Delphi® in the 1990s, for use in large diesel engines, to meet the challenge posed by increasingly stringent emissions legislation. The Delphi® Diesel Electronic Unit Injectors are suitable for nine to 16 liter heavy duty diesel engines used for on- and off-highway applications. This system is very popular on John Deere®, Hyundai®, Land Rover®, Renault® and Volvo® vehicles. The **Smart Injectors** for medium and heavy duty diesel engines are a high pressure, electronically controlled diesel fuel injectors that are designed to be combined with Electric Unit Pump to provide high pressure delivery for “cam in block” engines or engines with separate cam boxes. Smart Injector system is fitted to a wide range of DAF® (MX and PR), Paccar® and Yuchai® applications.

Check out our parts for Electronic Unit Injectors and Smart Injectors.
